A. Introduction

The entertainment industry has witnessed a significant shift in recent years with the rise of on-demand video streaming platforms. These platforms allow users to access a vast library of movies, TV shows, and original content at their convenience. One such successful platform is Netflix. “Nexer”, a platform inspired by Netflix, aims to replicate the success of its inspiration by providing an on-demand video streaming solution. In this Project Web Development System, the students aim to develop a website that allows users to watch movies and TV shows of Studio Ghibli films with a monthly subscription fee, that users can desirably cancel anytime.

Yet, Nexer is not just a depot of digital content, but a way for users to connect with the entertainment of Studio Ghibli films through a digital tangent. Users are able to enjoy a personal cinema and dive into an inspiring or exciting story, as well as to find unknown masterpieces or cross unusual boundaries just by pressing a few buttons within the website, offering a user-friendly interface and smooth user experience similar to that of a virtual cineplex.

Nexer's architecture is built on a solid foundation of PHP code files and a MySQL database, ensuring efficient data management, user authentication, and smooth integration of various functionalities. The PHP code files handle tasks such as user registration, login, payment processing, content display, and account management, while the MySQL database stores and organizes user information, subscription details, payment methods, and user favorites. In summary, Nexer is a student-developed, on-demand streaming platform inspired by Netflix. It offers users access to Studio Ghibli films, with a focus on quality, user experience, and community building.

B. System Objectives

The primary objective of Nexer is to develop a user-friendly on-demand Studio Ghibli subscription platform that delivers a satisfactory entertainment experience.

Key objectives include:

- Accessibility:** Ensure seamless access to a diverse catalog of movies and TV shows across various genres and languages.
- User Experience:** Prioritize user-centric design and intuitive navigation to enhance the overall viewing experience.
- Ghibli Collection:** Exclusively showcasing movies produced by Studio Ghibli. This curated collection includes iconic titles.
- Monetization:** Establish a sustainable business model through subscription-based revenue streams while offering competitive pricing plans.

A mockup of the Nexer sign-up page. The page has a white background. In the top left corner, the word "NEXER" is written in a bold, red, sans-serif font. In the top right corner, the text "Sign In" is written in a smaller, black, sans-serif font. In the center of the page, there is a section titled "Create a password to start your account" in a bold, black, sans-serif font. Below this title, there are two input fields: the first is labeled "Email" and the second is labeled "Add a password". Both fields are white with a thin gray border. Below the input fields, there is a red button with the word "Next" written in white, sans-serif font. A large, light gray watermark reading "AI L E N E R T O R R E S" is diagonally across the page.

fig. 2 (Nexer's Sign Up page)

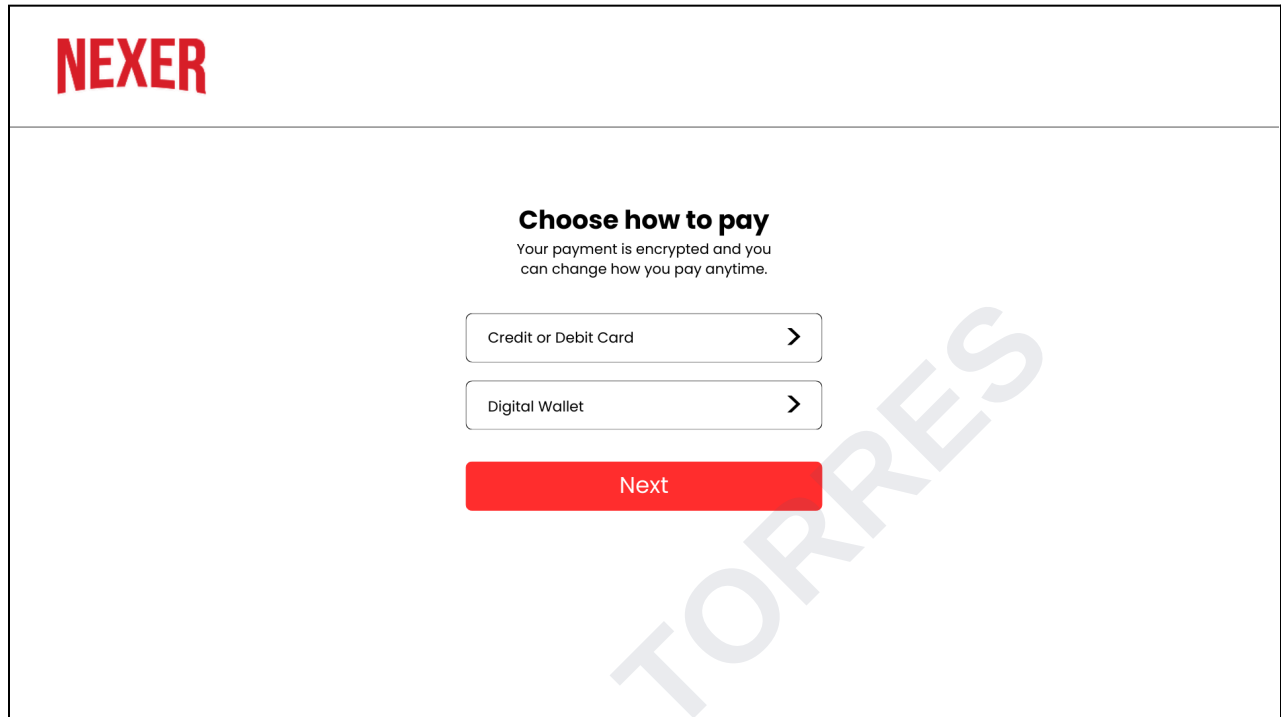

A screenshot of the NEXER payment page. The page has a white background with a red "NEXER" logo in the top left corner. The main heading is "Choose how to pay" in bold black text, followed by a subtext: "Your payment is encrypted and you can change how you pay anytime." Below this, there are two white buttons with black text and right-pointing chevrons: "Credit or Debit Card" and "Digital Wallet". At the bottom, there is a prominent red button with the word "Next" in white text. A large, light gray watermark "AI-LENE R. TORRES" is diagonally across the page.

fig. 3 (Nexer's Credit or Debit card Payment Page)

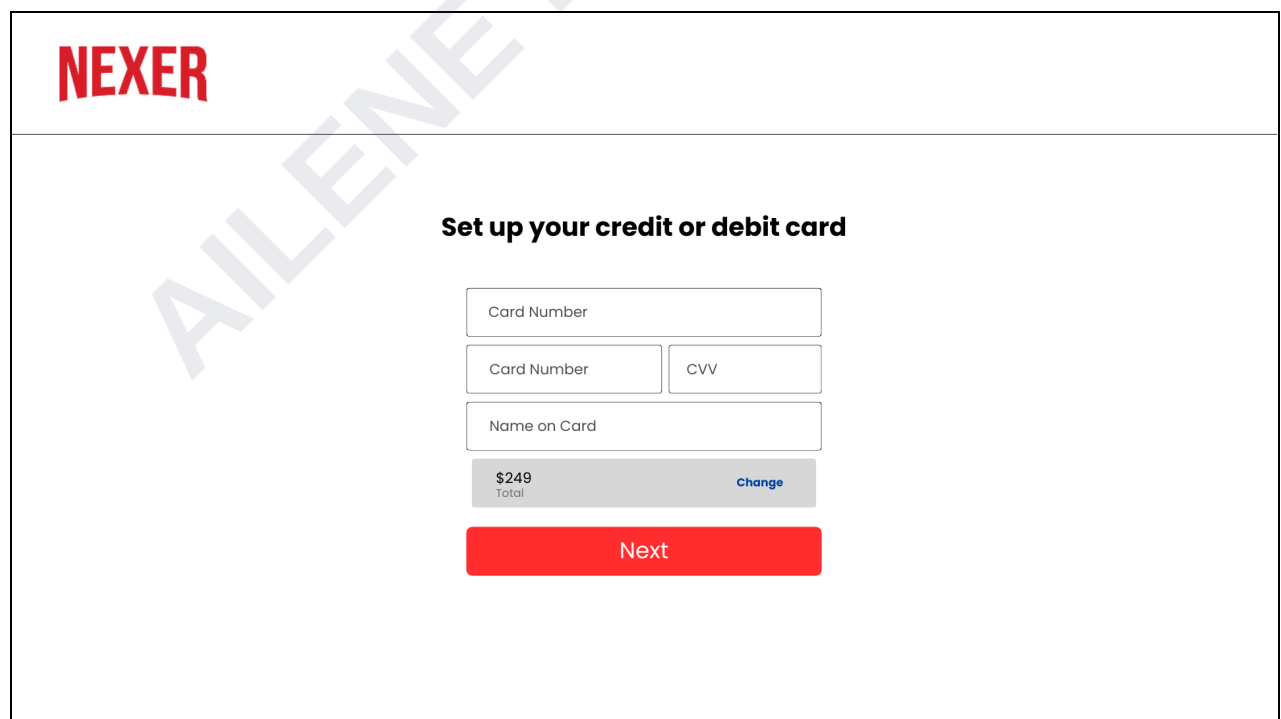

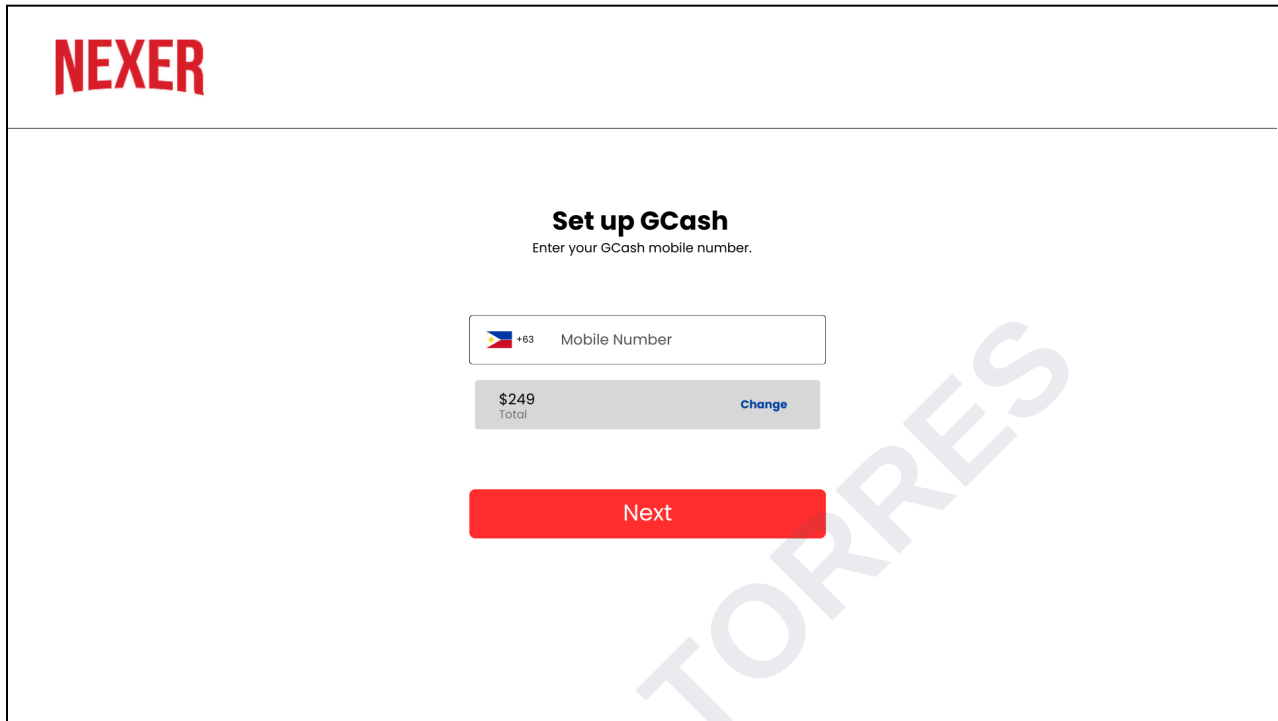

A screenshot of the NEXER credit card setup page. The page has a white background with a red "NEXER" logo in the top left corner. The main heading is "Set up your credit or debit card" in bold black text. Below this, there are three white input fields: "Card Number", "Card Number" (with a "CVV" label next to it), and "Name on Card". At the bottom, there is a gray box containing the text "\$249 Total" and a blue "Change" link. Below this, there is a prominent red button with the word "Next" in white text. A large, light gray watermark "AI-LENE R. TORRES" is diagonally across the page.

fig. 3.1 (Nexer's Credit or Debit card Payment Page)

The image shows a mobile payment interface for NEXER. At the top left is the NEXER logo in red. The main heading is "Set up GCash" with a subtext "Enter your GCash mobile number." Below this is a form with a Philippine flag icon, a "+63" country code, and a "Mobile Number" input field. Underneath the input field is a grey box showing "\$249 Total" and a "Change" link. At the bottom is a large red "Next" button. A large, light grey watermark "ALEN R. TORRES" is diagonally across the screen.

C. System Features

1. Content Library: Ghibli Movie Collection

- An exclusive library featuring the complete collection of Studio Ghibli movies, including iconic classics like "Spirited Away," "My Neighbor Totoro, and others.
- Curated sections highlight Ghibli's diverse repertoire, from enchanting fantasies to thought-provoking dramas, ensuring a comprehensive Ghibli viewing experience.

2. Search and Browse

- a. Enhanced search functionality specifically tailored for Ghibli movies, allowing users to find titles by keywords, directors, or characters.

3. Device Support (Laptop/Desktop Computers - Website)

- a. A dedicated website for laptop/desktop computers running the Windows operating system.
- b. User-friendly interface with intuitive navigation, ensuring an immersive viewing experience on web browsers.

4. User Profile

- a. It will indicate which user account is logged in.
- b. Profile settings for Ghibli fans to manage watchlists tailored to their Ghibli movie interests.

5. Watchlist

- a. Whatever the user adds to the watchlist, it will show in the watchlist section.
- b. Easily add or remove Ghibli titles from the watchlist, facilitating convenient access.
- c. Ghibli-specific watchlist functionality allows users to bookmark and organize their favorite Ghibli movies for future viewing.

6. Favorites

- a. Favorite Ghibli movie feature enabling users to mark specific Ghibli titles as favorites for quick access and reference.
