

PLUG AND DEFEND

USER MANUAL

REGISTRATION

1. Open <http://pndpi.local:5000/login>
2. Click Register New Account

The screenshot shows the 'Plug and Defend' login interface. At the top, there's a blue header with the text 'Plug and Defend'. Below it, a yellow banner says 'Please login to access this page'. The main content area is titled 'Welcome Back' and 'Please Sign in to your account'. It contains fields for 'Username' and 'Password', a 'Login' button, and links for 'Forgot your password?' and 'Don't have an account?'. A red arrow points to the 'Register New Account' link under the 'Don't have an account?' section. At the bottom, it says 'System Access Login Page'.

3. Fill all necessary fields with your information

The screenshot shows the 'PND System Access Account Registration' form. It has a blue header with the title and 'PND Access Request'. The form is divided into two main sections: 'Account Credentials' and 'Personal Information'. In the 'Account Credentials' section, there are fields for 'Username *' (with a hint 'Choose a username' and a note '1-20 characters, letters, numbers, underscore only (lowercase)'), 'Service ID / Personnel Number *' (with a hint 'e.g., PA-123456, PN-789012' and a note 'Your official military ID number (uppercase)'), 'Password *' (with a hint 'Create strong password' and a note 'Min 8 chars: uppercase, lowercase, number, special char'), and 'Confirm Password *' (with a hint 'Re-enter password'). In the 'Personal Information' section, there are fields for 'Full Name *' (with a hint 'First Name Middle Name Last Name') and 'Rank / Position *' and 'Military Branch / Unit *'. Red arrows point to the 'Username', 'Service ID / Personnel Number', 'Password', 'Confirm Password', and 'Full Name' fields.

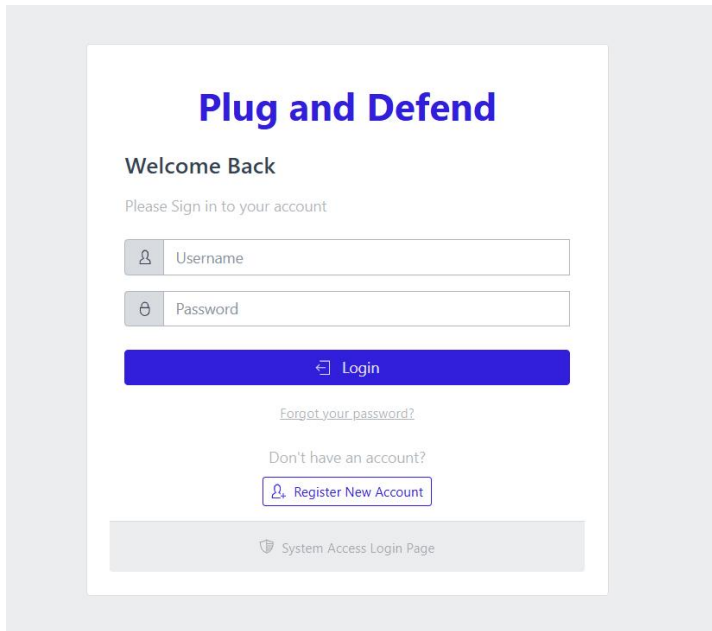

4. Then click Submit

The screenshot shows the registration completion screen. It has a yellow banner with the text 'Your account registration requires:' followed by three numbered steps: 1. **Email Verification:** Enter the 6-digit code sent to your email. 2. **Admin Approval:** Your account must be approved by a system administrator. 3. **Confirmation:** You'll receive an email when your account is approved. Below the banner, there's a blue button labeled 'Submit Registration' with a checkmark icon. A red arrow points to this button. Below the button, there's a link 'Back to Login' and a footer with the 'Plug & Defend' logo.

5. OTP will then be sent to your email for confirmation

LOGIN

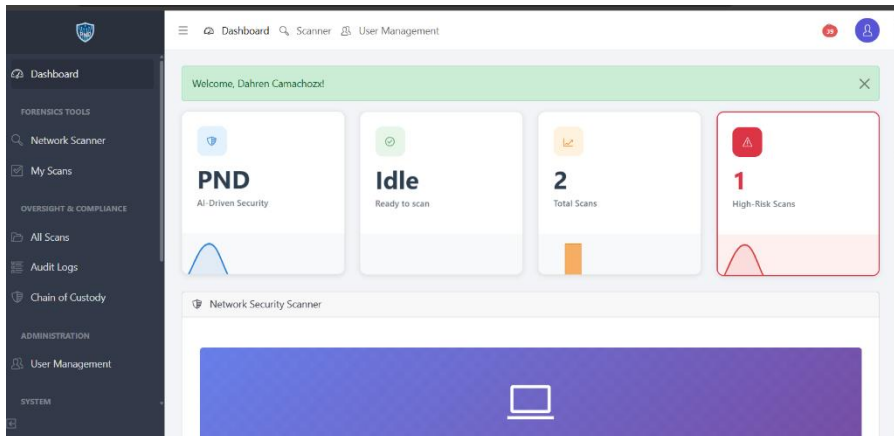

1. Your newly created accounts still need to get approved by an Administrator
2. Once approved, you can login through <http://pndpi.local:5000/login>

A screenshot of the 'Plug and Defend' login interface. The page has a white background with a light gray border. At the top, the title 'Plug and Defend' is in a bold, blue font. Below it, the text 'Welcome Back' is in a smaller, black font, followed by 'Please Sign in to your account'. There are two input fields: 'Username' with a person icon and 'Password' with a lock icon. Below these is a blue 'Login' button with a white arrow icon. Under the button, there are links for 'Forgot your password?' and 'Don't have an account?'. At the bottom, there is a 'Register New Account' button with a person icon. The footer text 'System Access Login Page' is in a small, gray font.

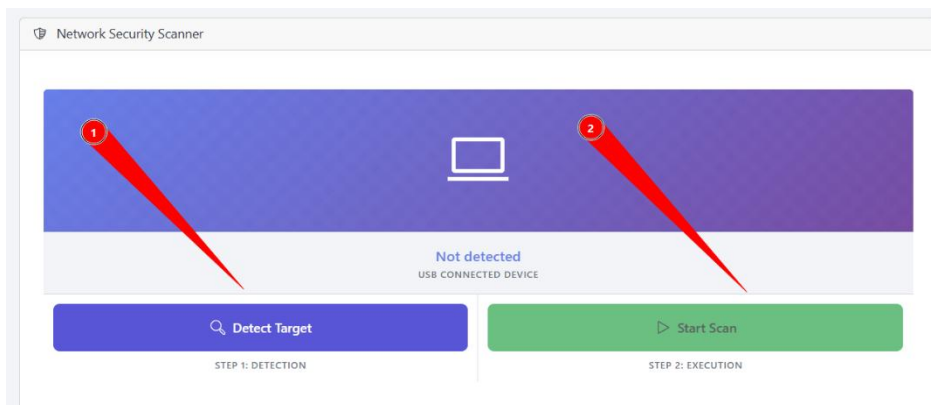

3. Enter your username and password, then click Login

DASHBOARD

- This is the Dashboard, it contains functionalities and information for quick access and retrieval

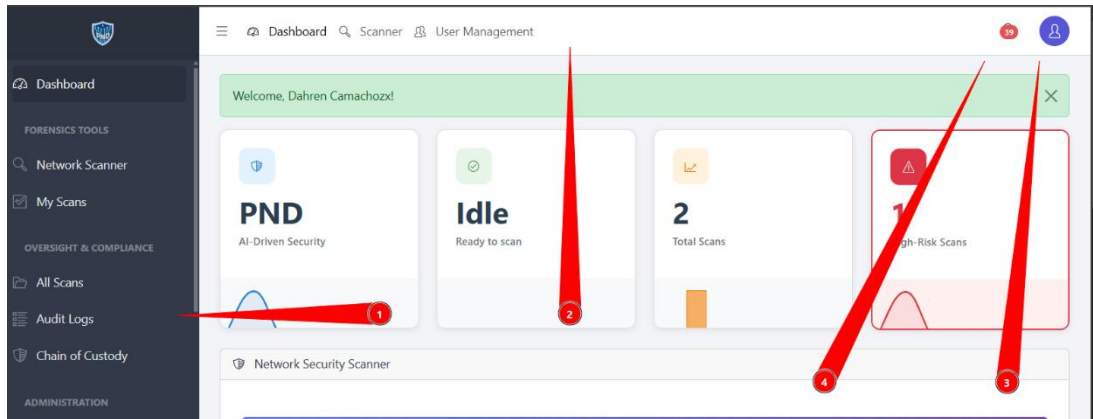

- This is the Quick Network scanner section, to use, please click the button according to its order:

- This is the Recent Scan section where you can see all scan instances

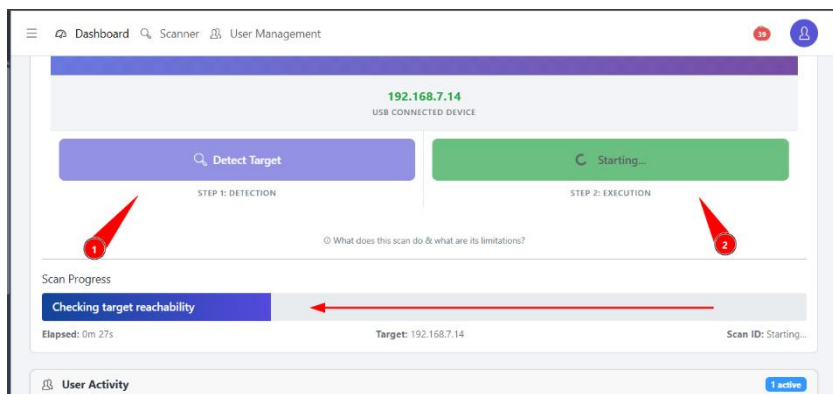

Recent Scans						
Scan ID	Timestamp	Target IP / MAC	Risk Level	Confidence	Status	Actions
scan-20260504-162109...	5/4/2026, 4:21:09 PM	ASI-PC008 192.168.7.14 B0:5C:DA:58:DB:E7	Medium	85%	Complete	View

- **(1) is the Sidebar, and (2) is the top navbar, (3) is the profile, (4) is the notifications**

NETWORK SCANNING

- 1. The quick network scan is located in the Dashboard.**
- 2. Click Detect Target, then click Start Scan**
- 3. While it scanning, wait for it to finish its Rubber Ducky payload, and after that wait for it to finish**

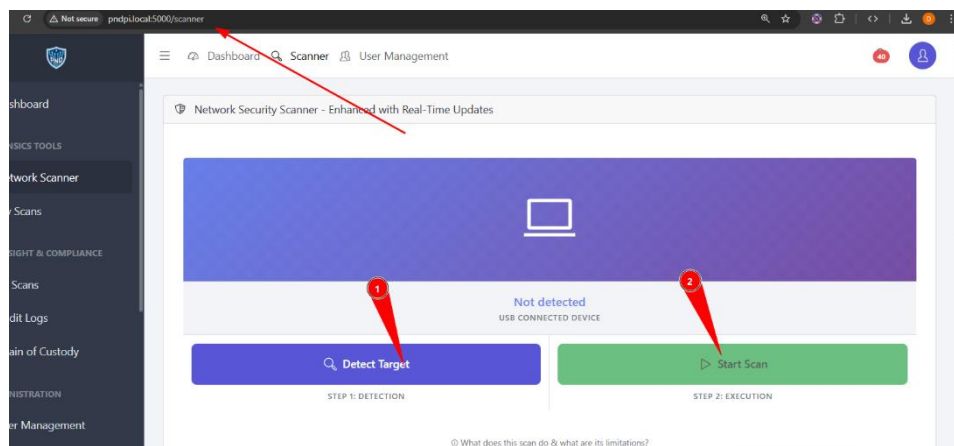

- 4. After the scan, your recent scan results will be listed on Recent Scans section:**

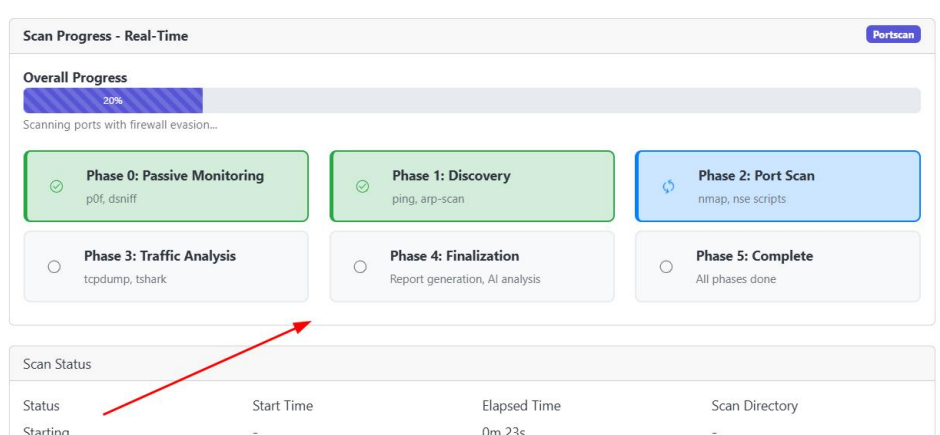

Recent Scans						
Scan ID	Timestamp	Target IP / MAC	Risk Level	Confidence	Status	Actions
scan-20260504-162109...	5/4/2026, 4:21:09 PM	ASI-PC008 192.168.7.14	Medium	85%	Complete	View
scan-20260504-161449...	5/4/2026, 4:14:49 PM	ASI-PC008 192.168.7.14	High	85%	Complete	View

5. The Dedicated Network Scanner with real-time updates is located in <http://pndpi.local:5000/scanner>

6. Perform the same step just like in the Quick Network Scanner

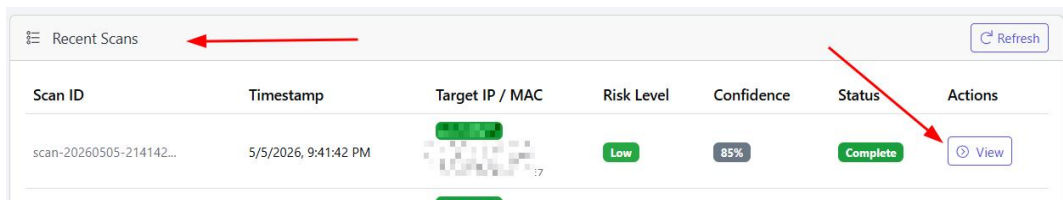

- **Current scan phases will be animated in this section:**

7. The scan instance will also be listed in the Recent Scans section after the scan finishes

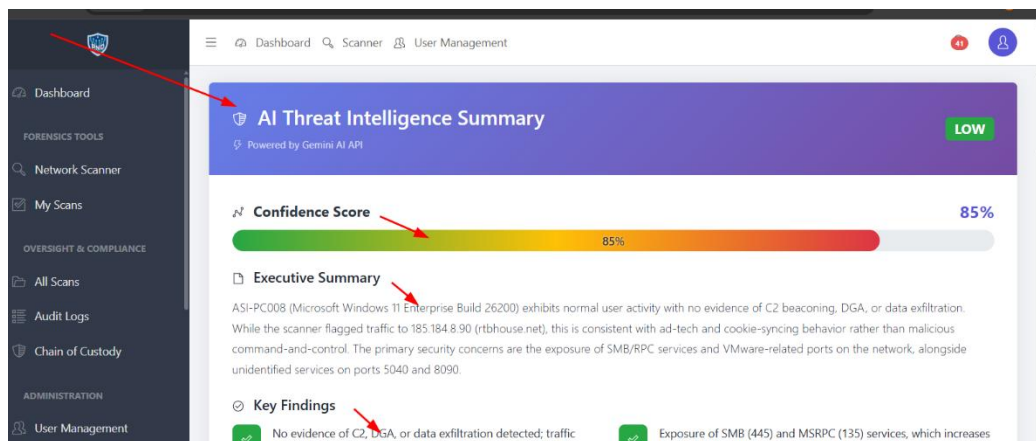

VIEWING THE ANALYSIS

1. On either the **Dashboard** or **Dedicated Network Scanner** page, scroll to **Recent Scans** sections, you will see a list of all scan instances there, to view, click **View**

Scan ID	Timestamp	Target IP / MAC	Risk Level	Confidence	Status	Actions
scan-20260505-214142...	5/5/2026, 9:41:42 PM	185.184.8.90	Low	85%	Complete	View

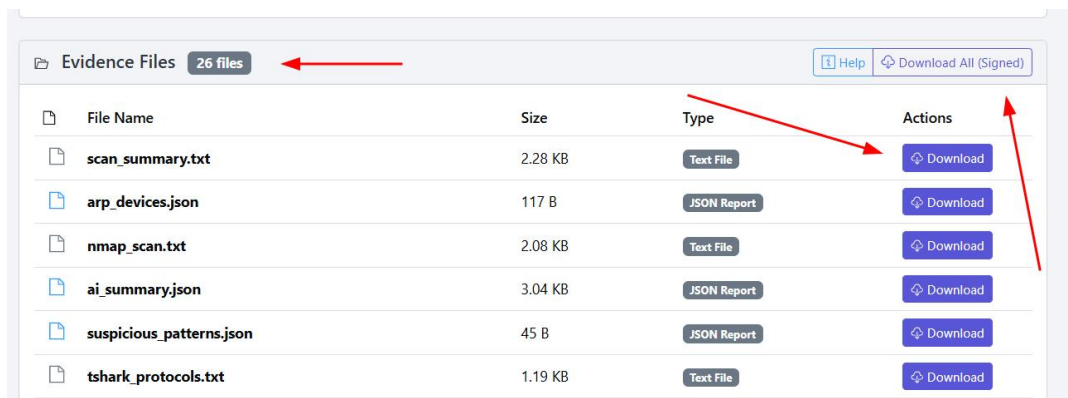

2. It will redirect you the **Scan Analysis Results Page** to view the analysis on that specific Scan Instance

3. From there you can look into the **AI Threat Intelligence Summary**, **Detailed Forensics Findings**, and even download the evidence files generated from the scan

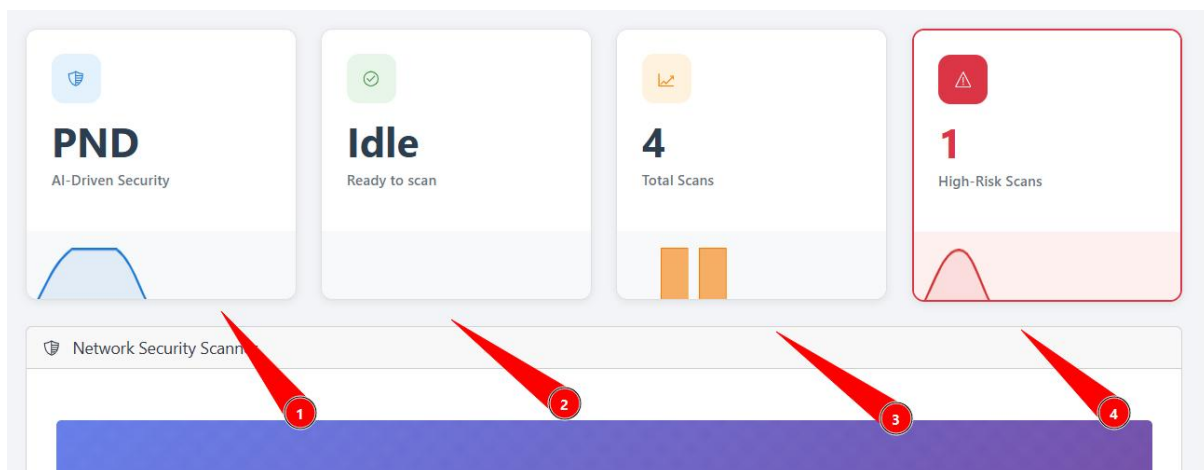

DOWNLOADING EVIDENCE FILES

1. On the Scan Analysis Results page, go down to Evidence files section. From there, you can either download one file or download it all as a .zip file

File Name	Size	Type	Actions
scan_summary.txt	2.28 KB	Text File	Download
arp_devices.json	117 B	JSON Report	Download
nmap_scan.txt	2.08 KB	Text File	Download
ai_summary.json	3.04 KB	JSON Report	Download
suspicious_patterns.json	45 B	JSON Report	Download
tshark_protocols.txt	1.19 KB	Text File	Download

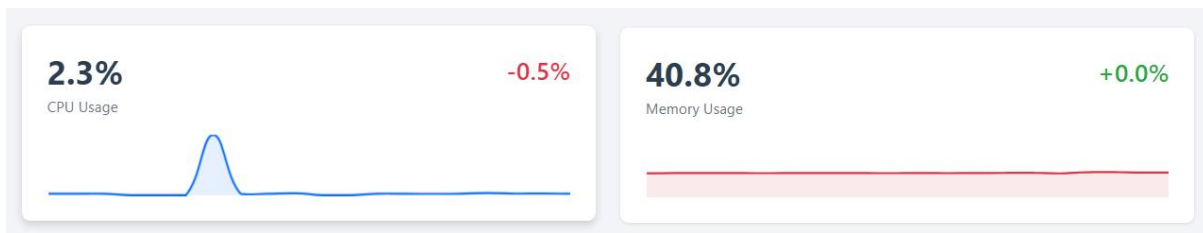

DASHBOARD STAT CARDS

- (1) Is the Total Scans Overview
- (2) is the Scan Activity Distribution
- (3) is the Scans Over Time
- (4) is the Risk Level Distribution

User Activity 1 active				
User	Role	Last Activity	Scans	Status
 	Admin	Just now	285	Online
 	Admin	1 day ago	2	Away
 	Admin	7 days ago	0	Away

- This is the User Activity card

- This is the CPU usage and Memory Usage card

USER MANAGEMENT (ADMIN ONLY)

1. Open <http://pndpi.local:5000/admin/users>

Username	Full Name	Rank	Branch	Role	Status	Last Login	Actions
				ADMIN	ACTIVE	2026-05-04 08:13	Disable
				ANALYST	ACTIVE	2026-04-03 08:25	Disable
				AUDITOR	ACTIVE	2026-03-24 08:31	Disable
				ADMIN	ACTIVE	2026-02-25 07:07	Disable
							Disable

2. This is where you can manage user access, view all the users, approve a pending request, Accept/Reject user deletion request and Enable/Disable user access to the system

MY SCANS PAGE

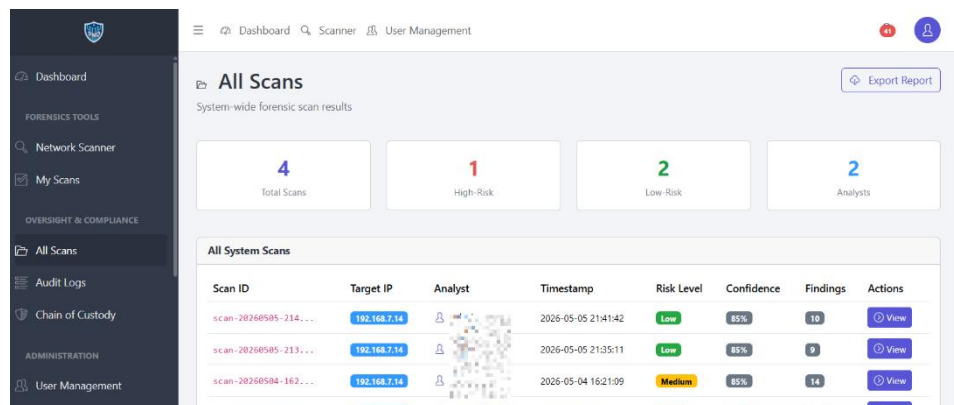

1. Go to <http://pndpi.local:5000/my-scans>
2. In this page you can see all your own initiated scans, organized, and can be filtered for faster referencing.

3. This is also the page where you can continue the failed AI analysis of a scan due to being offline or poor internet connection.

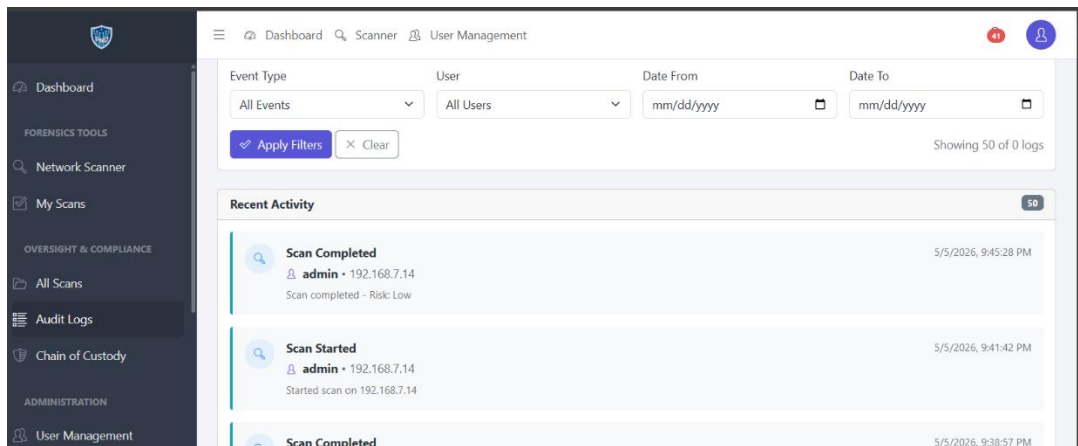

ALL SCANS PAGE (ADMIN ONLY)

1. Go to <http://pndpi.local:5000/all-scans>
2. This is where you can view all the scans initiated from different admin and analyst accounts

AUDIT LOGS

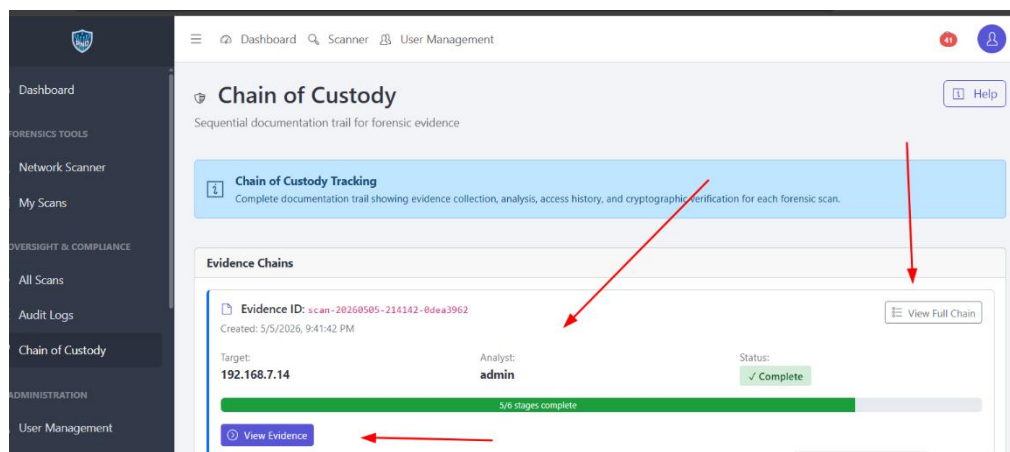

1. Go to <http://pndpi.local:5000/audit-logs>
2. This is where you can see all the necessary log-worthy notice and activities from different users (this function is only available for admin and analyst user access level)

3. This is also the page where you can export logs, and download you **PUBLIC KEY** for use in decrypting signed files using GPG4WIN (Kleopatra) – which is needed to be installed

CHAIN OF CUSTODY

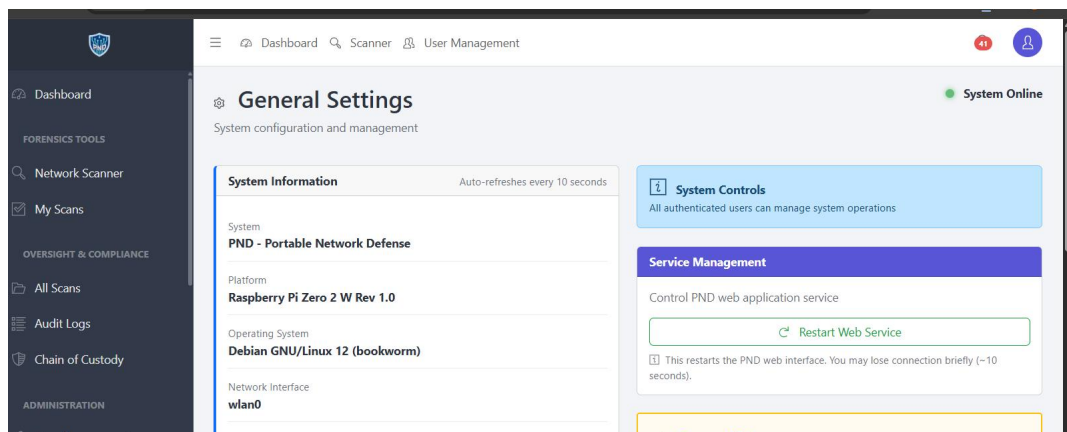

1. Go to <http://pndpi.local:5000/chain-of-custody>
2. This is where you can see all the chain of processes and checklists of each scan instance for detailed referencing and verification of custody of each scan instance

3. You can view each evidence (scan instance here) and track what processes had happened or what else is needed to be done in order for the custody process to be completed (Click View Full Chain)
4. Lastly you can also download the chain report here in .txt format

GENERAL SETTINGS

1. Visit <http://pndpi.local:5000/general-settings>

2. This is the page where you can view **System Information** and **System Controls** like shutting down the device, reboot, restart web server, and quick actions.

ACCOUNT SETTINGS

1. Go to <http://pndpi.local:5000/settings>

The screenshot shows the 'Account Settings' page. On the left is a dark sidebar with a menu. The main area has a header 'Account Settings' with the subtitle 'Manage your profile, security, and preferences'. Below this is a 'Settings' section with tabs for 'General', 'Security', 'Notifications', and 'Danger Zone'. The 'General' tab is active, showing 'Profile Information'. Fields include: Username (admin, Cannot be changed), Service ID (PA-123456, Cannot be changed), Military Branch (Phil Navy, Cannot be changed), Role (Admin, Cannot be changed), Full Name (Dahren Camacho), Rank/Position (Captain II), and Official Email (2.dahrencamacho@gmail.com). There is also a field for Location/Base.

2. This is where you can do an update on your profile information, Change Password, set Notification Preferences, and request account deletion.

PERSONALIZATION

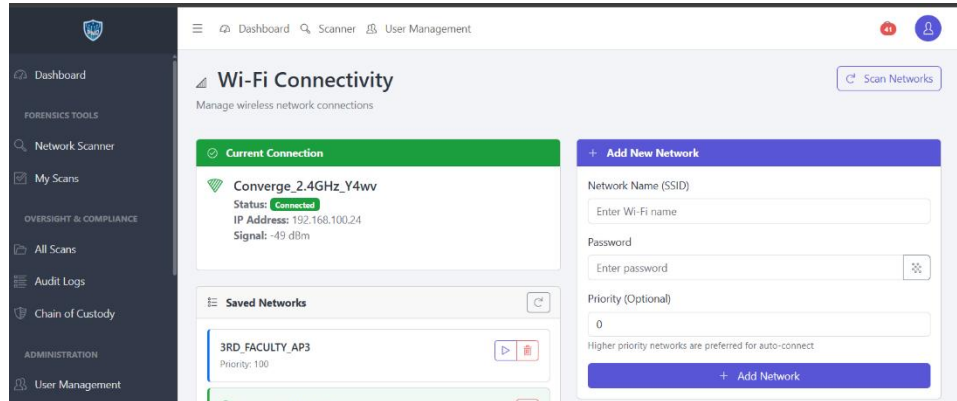

1. Go to <http://pndpi.local:5000/settings/personalization>

The screenshot shows the 'Personalization Settings' page. On the left is the same dark sidebar as the previous page. The main area has a header 'Personalization Settings' with the subtitle 'Customize the appearance of your dashboard'. Below this is a 'Branding' section with 'Custom Logo' (Choose File, No file chosen) and 'Brand Text' (PND System). There is also a 'Sidebar' section with 'Sidebar Background Color' (a color picker showing #323A49). Below the color picker is a note 'Default: #323a49'.

2. This is where you can change the appearance of the system from your account's perspective, you can set new modification and can revert to default.

CONNECTIVITY

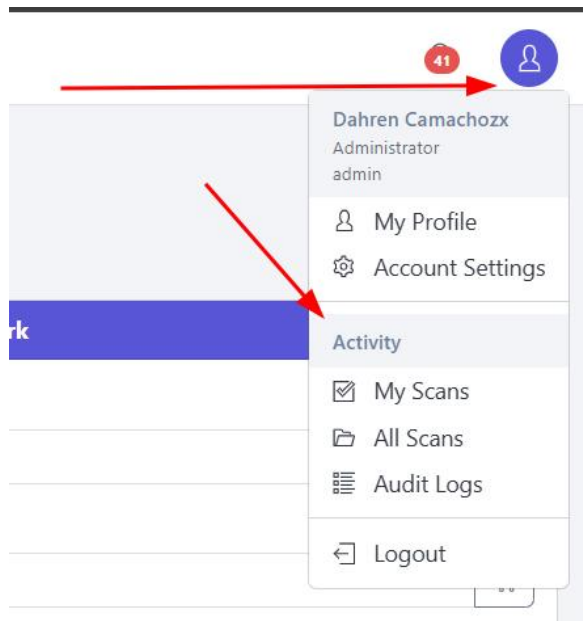

1. Go to <http://pndpi.local:5000/connectivity>

2. This is where you can add an SSID, connect to a network, modify WIFI credentials and set priorities on which access point should the device try to connect first.
3. This is essential as this is the way the device can connect to the internet, hence connecting to the AI API.

PROFILE ICON

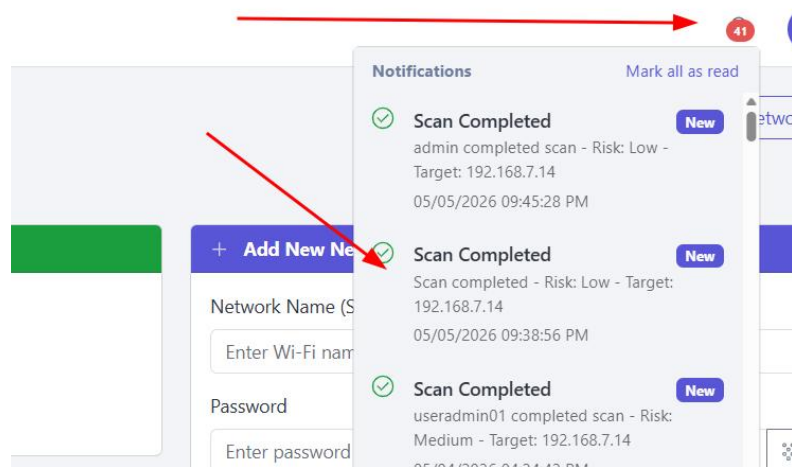

1. You can click this part:

- 2. This is where you can see quick links on other pages like My profile, Accounts Settings, etc.**

NOTIFICATION

- 1. Click this:**

- 2. This will show you necessary notification information about an activity or system notice**

How to Download & Verify Evidence

Download Process

Step 1: Click "Download All (Signed)" button

This creates a ZIP bundle with all evidence files, GPG signatures, and verification instructions.

Step 2: Download the ZIP file

You'll receive a file named scan_[ID]_evidence_signed_[TIMESTAMP].zip containing:

- All evidence files (JSON, PCAP, logs, etc.)
- GPG signature (.sig) for each file
- README.txt - Complete verification instructions

Step 3: Extract the ZIP file

Extract all files to a folder on your computer.

Step 4: Verify signatures

Follow the instructions in README.txt to verify each file's authenticity using GPG.

Verification of Evidence files using GPG4WIN (Kleopatra)

Quick Verification (Windows):

1. Install [Gpg4win](#)
2. Download the PND public key from Audit Logs page
3. Import key in Kleopatra (The public key in .asc file format)
4. Verify each .sig file using the Public Key
5. Take note that the file that needs to be verified is the sig files partnered with each files inside the folder of the extracted evidence .zip file

(example: pcap.log = original file, pcap.log.sig = is what needs to be verified)

It will then tell that the file is verified by "PNDSystem" meaning the original files hasn't been modified, ensuring file integrity.

Role Based Access Control

1. Functionalities and visibility of each varies depending on whether your account is an Admin, analyst or auditor account access level tier:

Analyst - Operational Forensic Role

Permissions:

- Run network scans and PCAP captures
- View ONLY your own scan results
- Generate forensic reports
- Trigger AI analysis on scans
- Submit evidence for review

Restrictions:

- Cannot view other analysts' scans
- Cannot add/modify user accounts
- Cannot delete evidence or change system settings
- Cannot access other users' data

Note: Ideal for cybersecurity analysts, threat hunters, and incident responders.

Auditor - Oversight & Compliance Role

Permissions:

- Read-only access to ALL scans
- Review complete audit logs
- Verify chain-of-custody
- Approve evidence exports
- Monitor user activity

Restrictions:

- Cannot run scans or capture data
- Cannot modify any data or settings
- Cannot delete or alter evidence

- Cannot change user permissions

Note: For internal audit, legal compliance officers, and supervisory personnel.

Administrator - Full System Access

Permissions:

- Manage users (create, disable, approve accounts)
- Configure system settings and API keys
- View ALL scans from all users
- Delete scans and manage evidence
- Access complete audit logs
- Manage RBAC policies

Restrictions:

- Should NOT perform investigations (separation of duties)
- Reserved for commanding officers and system owners

Note: Admin access requires highest clearance and approval from commanding officer.

End
